

Leading the Way in Modular Excellence

The Strategic Partner for Tier 1 and 2 contractors

WE ARE YOUR

**PARTNER IN SAFER,
COMPLIANT
CONSTRUCTION.**

ABOUT US

For over four decades, P McVey Building Systems has been a trusted supplier of high performance accommodation units across the UK and Ireland, recognised for our commitment to quality, reliability and industry-leading technical expertise.

**WHAT WE DO:
100% RESULTS. 0% DISRUPTION.**

We bridge the gap between urgent capacity needs and permanent, enduring quality. By moving the construction window off-site to our controlled factory environment, we protect your project timelines and the safety of the public.

EDUCATION

DfE-compliant classrooms and ancillary buildings, suitable for high capacity rapid decant solutions that protect the academic year during your build.

HEALTHCARE

We deliver compliant clinical spaces, including wards and diagnostics. Our off-site model ensures that hospital operations and blue-light routes remain undisturbed.

COMMERICAL

From high-spec offices to bespoke architectural hubs, we offer a fast-track to revenue with modular units that arrive up to 90% complete.

THE PROCESS

CONSULTATION & PLANNING

Bespoke site surveys and requirement mapping.

DESIGN & BUILD

Planned, engineered and tailored to your brief and brand.

INSTALL & MAINTAIN

Delivery and installation across the UK & Ireland with maintenance packages available.

KEY PROJECTS

With over **2,750+ projects delivered**, our track record speaks to our ability to meet the rigorous demands of all our clients be they Tier 1 contractors, a large multi national or SME.

of award-winning expertise

Over 2,750

completed projects

OUR PRODUCTS

MODULAR BUILDINGS

Offsite modular construction offers an efficient cost effective solution to your building requirements.

- Steel or timber frame construction
- Bespoke design options
- Rapid build process
- Fully relocatable

REFURBISHED MODULAR BUILDINGS

Do you have modular buildings that are no longer serving their purpose? Get them relocated and refurbished to create a new, fully functional space. Whether they need modernised, customised or complete a renewal, we can tailor the modular building to meet your needs and help you get the most out of your space.

ANTI-VANDAL CABINS

This unit includes an insulated steel door with a multi-point lock, anti-pry jamb, internal steel window shutters, and galvanized mesh grilles. Its fully welded, zinc-coated structure ensures high security.

Stackable up to three high, it features integrated bearing points, lifting lugs, fork pockets, and can be linked using our Link-System for larger accommodation blocks.

JACKLEG CABINS

Our Jackleg range are timber-framed and plastisol-clad, with steel external support legs (jack legs) to allow for levelling on uneven surfaces.

- Designed to meet specifications
- Range of optional extras
- Installed onsite in just one day
- Offer both sale and rental options to our clients

CTX MODULAR BUILDINGS

CTX buildings can fulfil requirements and offer a variety of design options:

- Low operating costs due to the use of high-quality materials and insulation variants
- Individual room designs in various sizes
- Ready for occupancy within a few weeks

MONO PITCHED CABINS

Our mono pitched cabins feature a sleek timber frame and sloping roofs, offering a modern touch to traditional designs. They're perfect for:

- Office spaces
- Garden rooms
- Home studios
- Beauty salons

AV PLUS

AV Plus units are engineered for multi-storey triple-stack installations with a robust structural system. Modules can be combined in multiple layouts for flexible designs, with options including accommodation, shower and toilet facilities, offices, and storage.

SEND CLASSROOM

Our modular classrooms are designed to meet the diverse needs of SEND learners, with every detail considered to create a positive, inclusive and supportive learning experience. Enhanced acoustic performance minimises noise levels, helping pupils maintain attention and reducing anxiety triggered by auditory overload.
